Luca Bazzetto

Data Engineer

Zagreb | +385 915551637 | luca.bazzetto@gmail.com | linkedin.com/in/lucabazzetto | lucabazzetto.github.io

Profile

Data Engineer building governed data products and analytics for Finance, Supply Chain, Manufacturing, HR, and Operations, with a focus on Oracle data platforms, property-graph modeling, and AI-ready data. EU citizen, working hybrid from Zagreb, open to relocation within Europe.

Experience

Electrolux Professional Group — Pordenone, IT (hybrid)

Data Engineer — *02/2026 – Present*

- Built enterprise data products and analytical solutions used across Finance, Supply Chain, Manufacturing, HR, and Operations by integrating data from multiple business systems into a governed analytics platform.
- Improved access to trusted business data by developing self-service reporting and operational analytics capabilities, reducing reliance on manual extraction and spreadsheet-based workflows.
- Modeled a 50k-product similarity graph in Oracle Property Graph (SQL/PGQ) that surfaces substitute products to sales teams, alongside graph models for traceability and exploration of manufacturing data.
- Partnered with business stakeholders and AI teams to translate operational requirements into data products, analytical services, and AI-ready datasets supporting reporting, automation, and semantic search initiatives.

Junior Data Analyst Intern — *09/2025 – 02/2026*

- Migrated ∼30 operational reports from legacy solutions to Oracle APEX for ∼500 users across supply chain, logistics, manufacturing, finance, and operations.
- Implemented company-level authorization logic, ensuring each user accessed only data relevant to their business entity.
- Built Oracle Data Integrator (ODI) mappings, Load Plans, and scheduled batch processes to support enterprise data migration and replication initiatives.
- Developed data monitoring, AI analytics, and automation components using Oracle GoldenGate, Qlik Sense, Power BI, SQL, Microsoft Graph API, Python, and Oracle Cloud Infrastructure.

Sinesy — Treviso, IT

Junior Business Intelligence Analyst Intern — *04/2022 – 08/2022*

- Developed predictive models for retail sales forecasting using ARIMA models in Python, implementing a scalable pipeline to generate weekly forecasts integrated into the Qlik platform

Education

University of Milano-Bicocca — Milan, IT

MSc in Data Science, 110/110 cum laude — *10/2026*

- Thesis with Electrolux: *A Property-Graph Recommender System for Industrial Product Substitution*

Cracow University of Technology — Krakow, PL

Erasmus+ Exchange Program, Computer Science — *10/2024 – 06/2025*

University of Udine — Udine, IT

BSc in Computer Science — *10/2022*

Projects & Awards

Text Classification |*Python, TensorFlow* [Repository]

- Developed a deep learning pipeline using CNN and LSTM architectures to classify scientific articles, implementing K-fold cross-validation and automated preprocessing to optimize model stability

Smoker Detection | *KNIME Analytics Platform* [App]

- **Awarded 2nd Place** for designing a predictive pipeline for smoker detection, addressing class imbalance and implementing automated deployment strategies

Technical & Professional Skills

Data Engineering: OCI, Oracle Database, ODI, GoldenGate, SQL Server, IBM DB2, ETL/ELT, Data Warehousing, Data Modeling, Data Governance
Analytics & BI: Oracle APEX, Power BI, Qlik, Reporting Automation, KPI Modeling
Programming & Query Languages: SQL (PL/SQL, SQL/PGQ), Python, R, Git
Platforms & Tools: Docker, Linux, PostgreSQL, FastAPI, REST APIs
AI & Graph: Property Graph, Vector Embeddings, Semantic Search, AI Agents, Microsoft Graph API, Copilot Studio
Languages: English (Professional), Italian (Native), Spanish (Basic)
