EXPERIENCE

Electrolux Professional Group

Pordenone, IT

Data Engineer

02/2026 – Present

- Developed a company-wide Graph Database to map product relationships and bill of materials, empowering colleagues to navigate thousands of product configurations and preventing customer churn to competitors, prioritizing in-stock alternatives
- Migration of legacy DB into Oracle Data Warehouse, utilizing ODI for batch processing and GoldenGate for real-time synchronization
- Developed a full-stack Catalog to serve as a centralized store for company-wide access to data tools, increasing cross-departmental collaboration
- Developed Python monitoring to detect table mismatches, ensuring data consistency, implementing an automated notification system

Junior Data Analyst Intern

09/2025 – 02/2026

- Designed and deployed an LLM-based workflow to structure raw email data and automate product code generation
- Consulted with all business units to design and deploy Oracle APEX and Qlik/Power BI Dashboards for all departments, translating multi-departmental needs into actionable data tools
- Designed Copilot Studio agents and Power Automate workflows to automate daily tasks
- Managed development lifecycle within a Scrum environment using Jira for task orchestration and Confluence for technical documentation

Sinesy

Treviso, IT

Junior Business Intelligence Analyst Intern

04/2022 – 08/2022

- Developed predictive models for retail sales forecasting using ARIMA models in Python, implementing a scalable pipeline to generate weekly forecasts integrated into the Qlik platform

EDUCATION

University of Milano-Bicocca

Milan, IT

MSc in Data Science

07/2026

Cracow University of Technology

Krakow, PL

Erasmus+ Exchange Program, Computer Science

10/2024 – 06/2025

University of Udine

Udine, IT

BSc in Computer Science

10/2022

PROJECTS & AWARDS

Text Classification | *Python, TensorFlow*

[Repository]

- Developed a deep learning pipeline using CNN and LSTM architectures to classify scientific articles, implementing K-fold cross-validation and automated preprocessing to optimize model stability

Movie Data Scraper | *Python, BeautifulSoup4, Selenium, MongoDB*

[Repository]

- Engineered an automated data ingestion system to aggregate multi-source movie data into a NoSQL schema, utilizing a modular CLI framework for scalable maintenance

Smoker Detection | *KNIME Analytics Platform*

[App]

- **Awarded 2nd Place** for designing a predictive pipeline for smoker detection, addressing class imbalance and implementing automated deployment strategies

TECHNICAL & PROFESSIONAL SKILLS

Data Engineering: Oracle Cloud, Oracle 23c, ODI, GoldenGate, SQL Server, MongoDB, ETL/ELT

Development: Python, SQL (PL/SQL, SQL/PGQ), GenAI (LLMs), R, Git, Copilot Studio

Analytics: Oracle APEX, Power BI, Qlik Sense, Tableau, Power Automate

Professional: Agile/Scrum (Jira/Confluence), Stakeholder Consulting, Requirements Gathering, Data Governance, Technical Documentation

Languages: English (Professional), Italian (Native), Spanish (Basic)
