EXPERIENCE

Electrolux Professional Group

Data Engineer

Pordenone, IT

02/2026 – Present

- Built enterprise data products and analytical solutions used across Finance, Supply Chain, Manufacturing, HR, and Operations by integrating data from multiple business systems into a governed analytics platform.
- Improved access to trusted business data by developing self-service reporting and operational analytics capabilities, reducing reliance on manual extraction and spreadsheet-based workflows.
- Designed graph-based data models enabling relationship-driven product analysis, traceability, and advanced exploration of manufacturing data.
- Partnered with business stakeholders and AI teams to translate operational requirements into data products, analytical services, and AI-ready datasets supporting reporting, automation, and semantic search initiatives.

Junior Data Analyst Intern

09/2025 – 02/2026

- Drove the migration of operational reports from legacy reporting solutions to Oracle APEX, defining reporting requirements and implementation approaches across supply chain, logistics, manufacturing, finance, and operations.
- Improved reporting governance by implementing company-level authorization logic, ensuring users accessed only data relevant to their business entity.
- Built Oracle Data Integrator (ODI) mappings, Load Plans, and scheduled batch processes to support enterprise data migration and replication initiatives.
- Developed data monitoring, AI analytics, and automation components using Oracle GoldenGate, Qlik Sense, Power BI, SQL, Microsoft Graph API, Python, and Oracle Cloud Infrastructure.

Sinesy

Junior Business Intelligence Analyst Intern

Treviso, IT

04/2022 – 08/2022

- Developed predictive models for retail sales forecasting using ARIMA models in Python, implementing a scalable pipeline to generate weekly forecasts integrated into the Qlik platform

EDUCATION

University of Milano-Bicocca

MSc in Data Science

Milan, IT

Expected 10/2026

Cracow University of Technology

Erasmus+ Exchange Program, Computer Science

Krakow, PL

10/2024 – 06/2025

University of Udine

BSc in Computer Science

Udine, IT

10/2022

PROJECTS & AWARDS

Text Classification | Python, TensorFlow

[Repository]

- Developed a deep learning pipeline using CNN and LSTM architectures to classify scientific articles, implementing K-fold cross-validation and automated preprocessing to optimize model stability

Movie Data Scraper | Python, BeautifulSoup4, Selenium, MongoDB

[Repository]

- Engineered an automated data ingestion system to aggregate multi-source movie data into a NoSQL schema, utilizing a modular CLI framework for scalable maintenance

Smoker Detection | KNIME Analytics Platform

[App]

- Awarded 2nd Place** for designing a predictive pipeline for smoker detection, addressing class imbalance and implementing automated deployment strategies

TECHNICAL & PROFESSIONAL SKILLS

Data Engineering: OCI, Oracle Database, ODI, GoldenGate, SQL Server, IBM DB2, ETL/ELT, Data Warehousing, Data Modeling, Data Governance

Analytics & BI: Oracle APEX, Power BI, Qlik, Reporting Automation, KPI Modeling

Programming & Query Languages: SQL (PL/SQL, SQL/PGQ), Python, R, Git

AI & Graph: Property Graph, Vector Embeddings, Semantic Search, AI Agents, Microsoft Graph API, Copilot Studio

Languages: English (Professional), Italian (Native), Spanish (Basic)
