Luca Bazzetto

Data Engineer

Zagreb | +385 915551637 | luca.bazzetto@gmail.com | linkedin.com/in/lucabazzetto | lucabazzetto.github.io

Profile

Data Engineer working where ERP data, graphs and AI meet. Hired after my internship, I have since led 4 data initiatives end to end with sales, finance and AI teams; two are now in daily production use. EU citizen, open to relocation.

Experience

Electrolux Professional Group — Pordenone, IT (hybrid)

Data Engineer — *02/2026 – Present*

- Co-designed and built a product-similarity service on Oracle SQL/PGQ graphs and text embeddings over 60k+ products, in production for B2B sales: users report saving ∼2 hours a day.
- Extended it from Laundry to Food Service and added live warehouse stock to the graph, so sales see alternatives that can ship now.
- Built a Bill of Materials property graph integrating 4 source systems (2 ERPs, 2 in-house), now queried daily by the call-center AI bot, whose text-to-SQL it overhauled.
- Automated a JD Edwards finance reconciliation: an APEX app triggers OCI Data Integration jobs on demand for the data the user filters, saving controllers days of manual work.
- Own operational reporting in Oracle APEX: gather requests, specify the reports, assign the build to a teammate and review before release (20+ reports).
- Maintain the ODI pipelines and GoldenGate replication that load 7 source databases (JD Edwards, Oracle EBS, SQL Server, IBM DB2) into the Oracle data warehouse.

Junior Data Analyst Intern — *09/2025 – 02/2026*

- Migrated all ∼22 legacy reports still in use to Oracle APEX for ∼200 users, with company-level access control.
- Built ODI mappings, Load Plans and nightly batch jobs; added alerts on GoldenGate replication failures.
- Built a Python agent on the Microsoft Graph API that turns free-text emails into structured product-coding requests, matched against 6,500+ suppliers.

Sinesy — Treviso, IT

Junior Business Intelligence Analyst Intern — *04/2022 – 08/2022*

- Built ARIMA retail sales forecasts in Python, with a pipeline delivering weekly forecasts into Qlik.

Education

University of Milano-Bicocca — Milan, IT

MSc in Data Science, 110/110 cum laude — *10/2026*

- Thesis with Electrolux: *A Property-Graph Recommender System for Industrial Product Substitution*

Cracow University of Technology — Krakow, PL

Erasmus+ Exchange Program, Computer Science — *10/2024 – 06/2025*

University of Udine — Udine, IT

BSc in Computer Science — *10/2022*

Projects & Awards

Tech Keynotes Calendar | *Python, GitHub Actions, iCalendar* — [Repository]

- Pipeline scheduled every 6 hours that curates tier-1 tech keynotes into a subscribable ICS feed and dashboard

Smoker Detection | *KNIME Analytics Platform* — [App]

- **2nd Place**, KNIME Machine Learning Challenge: predictive pipeline with class-imbalance handling

Technical & Professional Skills

Data Engineering: OCI, Oracle Database, ODI, GoldenGate (CDC), SQL Server, IBM DB2, ETL/ELT, Data Warehousing, Data Modeling, Data Governance
Analytics & BI: Oracle APEX, Power BI, Qlik, Reporting Automation, KPI Modeling
Programming & Query Languages: SQL (PL/SQL, SQL/PGQ), Python, R, Git
Platforms & Tools: Docker, Linux, PostgreSQL, FastAPI, REST APIs
AI & Graph: Property Graph, Vector Embeddings, Semantic Search, AI Agents, Microsoft Graph API, Copilot Studio
Languages: English (Professional), Italian (Native), Spanish (Basic)
